

INDUSTRIAL MANUFACTURING

Infor CloudSuite Industrial Enterprise solution summary

Your digital backbone

Infor® CloudSuite Industrial Enterprise is a comprehensive suite of cloud-based software solutions and services built on industry best practices. Cloud software ensures that you'll always have access to up-to-date technology. It will be the last upgrade you'll ever need. Here's a closer look at the capabilities you get when you choose this innovative platform to transform your business through digitalization.

Core components

The following components are included with the core Infor CloudSuite™ Industrial Enterprise offering:

Infor LN—A single, global platform for growth and innovation, Infor LN empowers you to run your entire business—across every department, site, and country. This uniquely versatile ERP system delivers everything companies need in a standard package.

With Infor LN at the core of CloudSuite Industrial Enterprise, you get:

- Complete visibility and control across your global organization and supply chain, with an integrated system
- The flexibility to make country-by-country adjustments as your business evolves
- Strong inventory and warehouse management capabilities, including advanced warehousing and fulfillment practices such as static and dynamic cross-docking, sub-contracting, and direct material supply
- A single solution for all discrete manufacturing typologies; repetitive manufacturing, job shop, project-based manufacturing, and assembly control based manufacturing
- Project management with quickly prepared estimates, budget monitoring, and accurate invoices for even the most complex manufacturing situations
- Service lifecycle management that makes it easy for you to offer and maintain service plans, schedule preventive maintenance, and identify upgrade or upsell opportunities
- Extensibility capabilities—so you no longer need to customize application source code to meet your unique business requirements

Birst for CloudSuites—Get the analytics functionality you need with relevant, pre-built industry content that makes key information easily accessible for smarter decision-making across your entire enterprise.

Implementation Accelerator for Industrial Enterprise—

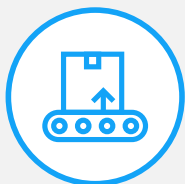

Get up and running quickly with pre-configured business processes and data models, user-defined menus, and industrial Enterprise specific training guides so your users can be productive faster, operate smarter, and learn how to take advantage of efficient process flows across your supply chain.

Infor OS—Serves as the foundation for your entire enterprise ecosystem, providing seamless integration between systems, a unified user experience across all applications, and organization-wide visibility into the real-time information you need to drive your business.

Infor OS includes:

- Collaboration capabilities that allow you to contextualize intelligence; increase efficiency by enabling employees to communicate alerts, share information, and publish discussions across the enterprise.
- Simplified security and user management that gives teams and individuals access only to the features and business processes they need to do their jobs—all available via single sign on.
- A framework that promotes easy integration of both Infor and third-party software applications to eliminates operational silos, dramatically improves exception management, and achieves end-to-end efficiency.
- A secure content repository where you can consolidate your business documents and ensure that common practices around governing document permissions are always enforced.
- An encrypted data repository that stores structured, semi-structured, and unstructured data from across your enterprise and gives you the infrastructure and analytics to unlock your data's true potential.

Add-on components

Solutions that enhance and extend this Infor CloudSuite are available for additional subscription fees. Contact your sales representative for more information. Common add-ons for CloudSuite Industrial Enterprise include:

- **Infor Automotive Exchange**—Infor Automotive Exchange extends and complements traditional ERP order-to-cash capabilities by normalizing customer demand data across all customers. This solution supports standard automotive business practices and trading partner variations of standard business practices, and seamlessly integrates into a supplier's existing enterprise system landscape.
- **Birst Professional Plus or Birst Enterprise**—Use a cloud business intelligence (BI) platform to help you quickly understand and optimize complex processes and easily upgrade from built-in analytics. Built with patented automation and machine learning technologies, Birst's "networked BI" approach connects your teams and applications via a trusted network of analytics and insights, giving you a comprehensive view of your business to make smarter decisions.
- **Infor CRM**—Infor CRM is an award-winning CRM solution that delivers a complete view of customer interactions across your sales, marketing, customer service, and support teams, so they can collaborate effectively and respond promptly and knowledgeably to sales opportunities and customer inquiries—both in the office and in the field.
- **Infor CPQ**—Infor Configure Price Quote solution gives you the processes, rules, constraints, and associated data to build configurations in real-time and deliver accurate quotes to customers. You'll be able to speed ordering while satisfying precise customer specifications.
- **Infor EAM**—With asset management, materials management, and procurement tools, Infor EAM enables you to keep a constant watch on asset condition and performance, evaluate data to find key trends and anomalies, and make better decisions based on real-time information.

Top 5 reasons you need CloudSuite Industrial Enterprise

1. Improve on-time and on-budget product delivery to your customers
2. Speed time-to-value with fast deployment
3. Quickly scale infrastructure to support your growing business
4. Automate previously manual tasks across your operations
5. Get real-time visibility across your entire enterprise

- **Infor Factory Track**—Infor Factory Track™ provides you the next level of factory floor and warehouse automation, so you can streamline your production processes, speed inventory handling, track labor, and automate attendance operations.
- **Infor GT Nexus**—The GT Nexus Commerce Network is a single-instance business network with a thriving community of suppliers, manufacturers, logistics providers, financial institutions, and category leaders across industries to help companies achieve the velocity and control needed to compete in today's rapidly-evolving markets.
- **Infor Local.ly**—Infor Local.ly™ provides a common localization platform for tax calculation, reporting, accounting, and electronic messaging. It monitors for regulatory and statutory changes, proactively providing updates to critical applications across your operations.
- **Infor MES**—Infor MES develops operational models to simulate plant floor activities. It determines optimal times to restock and replenish inventories, projects just-in-time needs, improves traceability, and maximizes the overall efficiency of your manufacturing operations.

- **Infor Risk and Compliance**—Infor Risk and Compliance supports your finance, audit, and IT users by automatically identifying exceptions or controls breakdowns and correcting issues immediately. It also automates compliance obligations to help stay current with regulatory requirements.
- **Infor SCE Warehouse Management**—Infor SCE is an intuitive solution designed to let you manage distribution center activities holistically. It combines warehouse fulfillment with embedded labor management and 3D visual analysis in a unified application. Next generation, technology-enhanced warehouses offer unprecedented visibility into inventory, orders, equipment, and people so you can leverage automation, reduce costs, increase efficiency, improve customer responsiveness, and reduce complexity
- **Infor Mobile Field Service**—Deliver better services on time, mobilize field service technicians, adjust schedules as new orders arrive, and fine-tune information systems on the fly. Enable service technicians to quickly solve challenges with access (both in the office and out in the field) to accurate and timely information about warranties, contracts, and equipment lifecycles.
- **Infor Supplier Exchange**—Infor Supplier Exchange supports online collaboration among suppliers up and down the value chain, including logistics service providers, outside processors, purchase parts suppliers, and discrete purchase order suppliers. This solution provides better visibility into entire supply ecosystems through seamless online collaboration.
